To our supporters: As many know Houston Diesels has been a self-supported organization for the last 7 years. Since Houston Diesels creation, the organization has always donated 100% of the proceeds raised for each charity, directly to that charity. Our organization proudly does not take any percentage of the donation. We stand strong on that value and hope to continue down that path as long as possible. Houston Diesels has been successful thus far due to the sales of our club product. We have reached a huge milestone during our existence with being able to donate over \$450 thousand dollars to charities, and we look forward to even more growth. With continual growth this allows Houston Diesels the ability to give back much more to the community that supports us so graciously. Houston Diesels would appreciate the communities support as we have never done an event to help the club directly. We look forward to gathering with everyone to support this beautiful event.
